

# InStream Solutions Designed for Your Business

## For Manufacturing

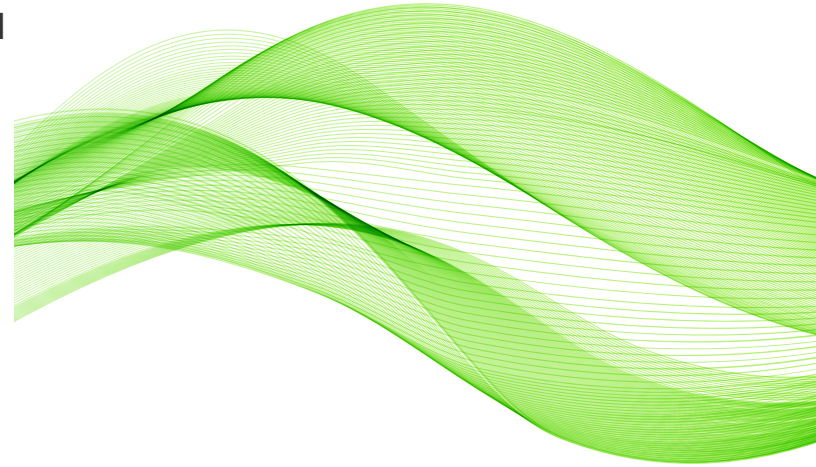

### WHY ADD INSTREAM TO YOUR TEAM

Manufacturing corporations disseminate large quantities of crucial documentation throughout production timelines. Checklists, order forms, and receipts are vital to running a successful business model. Digital transformation simplifies processes by helping organizations to manage their documents without overusing paper. At InStream, we strive to provide efficient document management and streamlined workflow through hardware and software installation.

### FOCUS ON WHAT MATTERS MOST

Allow InStream to optimize your current software and maximize its potential within your organization. Our team is available to support you through the processes of understanding available options and presenting you with systems that meet your exact needs. We will offload tedious management and administrative tasks, so you can focus on serving your customers.

### MAXIMIZE WORKFLOW EFFICIENCY

Maximize efficiency within your organization by creating a workflow system with InStream using our experts and the power of automation.

#### INSTREAM HAS:

- > Decades of combined experience in the automation and advanced capture industry.
- > Experts across all fields who are ready to help you automate processes and improve workflow.
- > Strive to provide the best customer experience for each of our clients.
- > Employees nationwide who provide comprehensive services across the United States.

InStream works with manufacturing organizations to improve workflow and records management to free up time and resources. Our team assists with optimizing solutions, so you have the power to better serve your clients.

### **eForms**

Simplify the job application and onboarding process with the use of eForms. Collect and analyze your data without the hassle of going through multiple actions. eForms will collect submissions and send them directly to the next participant in the workflow.

### **Custom Workflows**

InStream creates workflows that give your team the power to send items that need to be reviewed and approved to designated personnel. By utilizing a tailored workflow, errors are measurably reduced and production timelines run smoothly.

### **Managed IT**

InStream offers a range of services that improve operations and cut costs. InStream schedules and completes software maintenance and security updates, which reduces the burden on IT departments. Turn to a trusted Managed Service Provider for proactive and viable solutions to your long-term needs.

### **Document Management**

AP processes and proof of delivery documents are verified and completed digitally with a DMS. Cloud-based document management allots reliable storage without taking up physical space, freeing funds to reallocate to other departments.

### **Document Scanning**

If you are planning to go paperless or digitize, Scan-to-Zero is the solution for you. InStream will automate the scanning and digitizing process for paper documents. All the paper from your organization will be removed and scanned into a secure cloud; and kept in a physical location to meet record retention requirements.

### **Advanced Data Capture**

Advanced data capture can identify errors immediately in the production process. Equip your company with accurate data with OCR and ICR technology that converts your data into structured, meaningful information.
